

# Site Management

is a powerful solution designed to revolutionize your construction and engineering projects. With our cutting-edge Gnosis app, we aim to bridge the gap between office and field operations, specifically targeting the needs of construction contractors, engineering consultants, and local and state government agencies.

**THE PROBLEM:** *The construction industry is marred by fragmented communication, complex quality assurance processes, and coordination challenges with suppliers and subcontractors, negatively affecting site performance, safety, and efficiency.*

Overall, Site Management provides immense value to our users by optimizing communication, simplifying quality assurance, and increasing efficiency on-site while setting a new industry standard for construction project management.

**THE SOLUTION:** *Our exceptional Site Management feature is designed to tackle these pain points head-on, ensuring optimal control over your projects.*

**Here's how:**

## ■ ENHANCED COMMUNICATION & COLLABORATION

Our Gnosis app ensures seamless integration of office and field operations, enabling improved team dynamics and constant access to crucial construction information.

## ■ STREAMLINED QUALITY ASSURANCE

Site Management connects your engineering team with the site team remotely, for a smooth release of hold points and real-time Inspection Test Plan (ITP) updates.

## ■ SUPPLIER & SUBCONTRACTOR MANAGEMENT

Easily manage and track suppliers and subcontractors, affording you complete control over their contributions to the project.

## ■ SITE PERFORMANCE VISIBILITY

Gain valuable insights into your site teams' performances by utilizing the built-in media capture and sharing capabilities of our Gnosis app
